Curriculum Vitae

Personal Information				
English Name:	Lam Ka Wai	Chinese Name:	林嘉威	
Gender:	Male	Date of Birth:	2005/09/25	
ID No.:	1414063(6)	Student ID No.:	DC325629	
Major:	COMPUTER SCIENCE	Year of Study:	Third year	
Telephone/ Mobile:	62311580	Email:	Dgtdi45354@gmail.com	
Address:	澳門飛能便度街興信大廈			

Highschool: Macau Keang Peng Secondary School (澳門鏡平學校(中學部))

Working/Training Experience

Part-Time Tutor / Academic Assistant

Structured complex problems into clear, logical steps to improve comprehension, strengthening my ability to explain technical concepts clearly and methodically.

Academic Course Projects

1. **IT Job Market Analysis & Recommendation System**
   - Built a data pipeline: developed a robust web scraper to collect IT job postings from LinkedIn across 6 countries.
   - Engineered data processing workflows for cleaning, feature extraction (skills, location, level), and TF-IDF vectorization, and output Top 5 ranked results.
2. **Big Data System Design for Career Guidance**
   - Designed a scalable big data system architecture using Apache Spark for distributed processing of IT job market trends.
   - Proposed a cloud-based pipeline from data ingestion to interactive dashboard visualization.
3. **Medical Domain Q&A System with RAG & LLM**
   - Built a Retrieval-Augmented Generation (RAG) system for specialized medical Q&A, deploying models locally via Ollama and orchestrating workflows with Dify.

Activity Participation

Achievement

- **Dean‘s Honor List (2nd Semester, AY 2024/2025)**
  Faculty of Science and Technology, University of Macau.
- **Dean‘s Honor List (1st Semester, AY 2025/2026)**
  Faculty of Science and Technology, University of Macau.

Interdisciplinary Engagement

- **Boya Talk: “Bronze, Chips and Sea Peoples” held by UM Library**
  Participated in an interdisciplinary lecture exploring the historical impact of technological shifts (from Bronze Age collapse to modern chips) on civilization, developing a broader perspective on technology’s role in societal transformation.

Hobby/Interest

- **Basketball:** Value the sport for fostering teamwork, strategic thinking, and resilience under pressure, which is valuable in collaborative tech projects.
- **Following Tech Trends:** Reading about new developments in software and technology, often through blogs or community forums. It helps me stay curious about the industry I’m preparing to enter.

Self-Introduction

- I am a dedicated third-year Computer Science student at the University of Macau, where my consistent academic effort has been recognized with inclusion on the Faculty’s Dean’s Honor List in twice semesters. Through coursework and academic projects, I have gained initial experience with Python , used libraries like Pandas for basic data processing tasks,and developed a Medical Q&A system using RAG and LLMs. I am comfortable following tutorials and documentation to implement functional code, and I am eager to deepen my practical understanding in a real-world setting.
- I am a conscientious learner who pays attention to detail and enjoys the process of solving problems step by step. I work well in team environments and understand the importance of clear communication and asking questions. I am actively seeking an internship where I can apply my foundational knowledge and contribute as part of a development team while growing my technical capabilities.
